

OUR FOUNDING AND MISSION

We're fencers. We've put together foils, épées and sabers for years. We built weapons from old parts, new parts or parts we made ourselves. We were never satisfied with substandard weapons bought elsewhere; they always needed tweaking. The blade would need a heavier pommel, or the grip would need new wrapping. Once tweaked, our weapons would handle extraordinarily well and people noticed the difference. But tweaking wasn't enough. We wanted more variation, customization, increased quality, and the ability to meticulously balance each weapon. We founded Benjamin Arms to do just that.

We examined antique weapons, catalogues and photographs to reintroduce dozens of guard, grip, and pommel designs. We found the best steel, machinists, seamstresses, jewelers, leatherworkers, metal spinners, casters, and wood suppliers to help build our products.

We're now making the highest quality fencing weapons available. We know this because we design and supervise the production of every component to every weapon, because every weapon produced by Benjamin Arms is hand built and balanced, and because our customers tell us so.

It is the hope and goal of Benjamin Arms to continue producing exceptional fencing equipment because fencers deserve nothing less!

OUR LOCATION, WORKSHOP & COMMUNITY

Benjamin Arms is located in Northern California in the city of Arcata. Arcata is located between the Pacific Ocean and the great Redwood National Parks. The air is clean and the people colorful. What's little known about the area is its great wealth of small businesses and manufacturers. Per capita Arcata has more working artisans than any other city in California. We pride ourselves in utilizing and supporting these artisans, the local economy and our community. We're donating a deluxe weapon and display rack to the non-profit Big Brothers & Big Sisters of Humboldt County benefit auction, and our founder was a speaker and presenter at South Fork High School's career fair speaking about starting a business. We're committed to giving back to the community that made our dream possible.

OUR MANUFACTORY

Quality *and* quantity. We at Benjamin Arms did not want to sacrifice one for the other. We decided the best way to get the highest quality parts made in steel, leather, wood or cloth was to find the people best at it. We utilize the best locally so you get the lowest price, highest quality, and faithful efficiency. You don't wait for us to cut your guard out, tan your leather, lathe & thread your pommel or stitch your bag together; you only wait for us to hand assemble your weapon.

We really mean local when we say it. From our business office it's a half-mile walk to our seamstresses and machinists. We import no materials or services from abroad. All our parts and weapons are *American Made*. We are committed to supporting local businesses, and our local and national economies. In doing so we have produced the highest quality fencing products available.

OUR WEAPONS

Weapons produced by Benjamin Arms are 100% hand made using *only* the quality parts designed by Benjamin Arms and blades hand-picked by our staff. Each weapon is individually balanced with pommels machined to a spectrum of eight weights in five-gram increments, an eighty-year-old process we've resurrected. We use the highest quality leather, fabrics, woods and steels in all our products, giving you confidence in your purchase.
